

THE NEW
CRYPTOCURRENCY
PAYMENT ECOSYSTEM
THAT REWARDS ITS
USERS FOR THEIR
TRAVELS AND TOURISM.

[Whitepaper](#)

01.

Introduction

1.1 What is Rentals?

Rentals is a revolutionary platform that integrates all aspects of the travel experience into a single ecosystem. Leveraging blockchain technology and cryptocurrencies, Rentals streamlines the reservation and payment process, ensures transparency through genuine customer reviews, and rewards users for their activities and interactions on the platform.

1.2 How Rentals Works

The platform features functionalities such as:

Exclusive customer reviews

Cryptocurrency payments with automatic conversion

Digital rewards

User-generated content and

Comprehensive integration of travel and accommodation services.

02.

Revenue Share Model

2.1 Token Growth Amplifier

The “Token Growth Amplifier” is an innovative revenue-sharing model implemented by Rentals. Under this model, 30% of the revenue generated by the platform is directly invested in purchasing Rentals (RENTS) tokens from the market. This investment has several positive implications for the platform and its users.

2.2 How Token Growth Amplifier Works

 **Revenue Reinvestment:** 30% of the revenue generated from each transaction or service is allocated to purchasing RENTS tokens. This increases demand and, consequently, the token's value.

 **Increased Volume and Liquidity:** Regular purchases of RENTS tokens enhance transaction volume and market liquidity, facilitating easier trading.

 **Token Appreciation:** The ongoing increase in demand and purchase of RENTS tokens helps to drive up the token price, benefiting all investors and platform participants.

 **Investor Confidence:** The model's transparency and the direct link between platform revenue and token appreciation create a virtuous cycle, encouraging greater engagement and trust in the Rentals ecosystem.

2.3 Benefits of Token Growth Amplifier

Increased Token Value: Boosts demand and token value, benefiting investors.

01

Improved Liquidity: Eases token transactions and trading.

02

Enhanced Rewards: Users and investors benefit from continuous token appreciation.

03

Incentivized Participation: Encourages active use of the platform and token for rewards and transactions.

04

03.

Tokenomics

3.1 Overview of Rentals Token (RENTS)

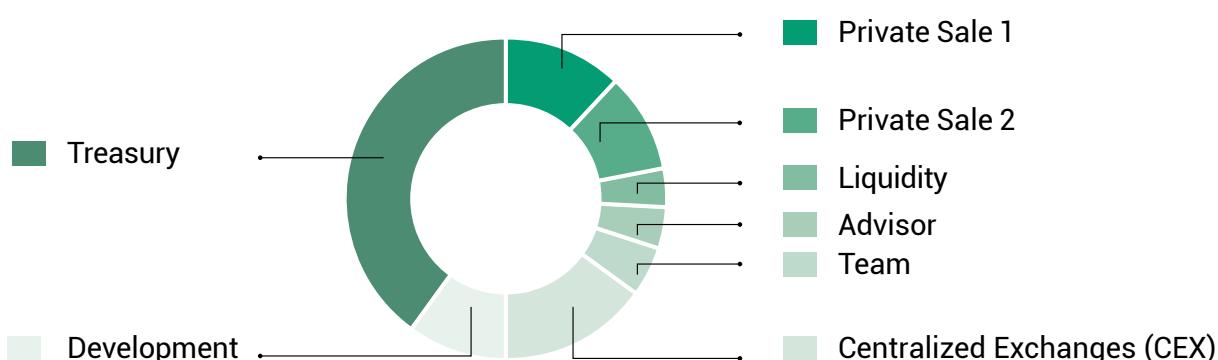

The Rentals Token (RENTS) is the core utility token within the Rentals ecosystem. It facilitates transactions, rewards, and various interactions on the platform, leveraging blockchain technology to ensure transparency and security.

3.2 Token Details

Token Name: Rents Token (RENTS) | **Token Type:** BSC | **Total Supply:** 100,000,000 RENTS

3.3 Token Distribution

Category	Percent	Price		Vesting
Private Sale 1	12.00%	\$0.025	12,000,000	40% at TGE cliff 30 days - 3 months linear vesting
Private Sale 2	10.00%	\$0.050	10,000,000	70% at TGE cliff 30 days - 3 months linear vesting
Liquidity	4.00%	\$0.075	4,000,000	locked 2 years
Advisor	4.00%		4,000,000	cliff 1 year - 8 months linear vesting
Team	5.00%		5,000,000	cliff 1 year - 5 months linear vesting
Centralized Exchanges (CEX)	15.00%		15,000,000	cliff 30 days - 10 months linear vesting
Development	10.00%		10,000,000	cliff 6 months - 15 months linear vesting
Treasury	40.00%		40,000,000	cliff 3 months - 21 months linear vesting
Total	100%		100,000,000	

3.4 Token Utilization

Payment for Services:

Users pay in traditional currencies (real or dollar), which are automatically converted to RENTS for transactions and service fees.

Rewards:

Tokens are distributed as rewards for activities such as reviews, content contributions, and active participation.

Incentives:

Used to attract new users, partners, and to promote platform engagement.

3.5 Token Value Proposition

Security and Transparency:

Built on the Ethereum blockchain, ensuring secure and transparent transactions.

Utility:

Acts as the primary medium for transactions, rewards, and staking within the Rentals ecosystem.

Growth Potential:

As the platform scales and more users participate, the demand for RNT is expected to increase, potentially enhancing token value.

04.

Yield Staking

4.1 Overview of Yield Staking

Yield Staking allows users to earn rewards by locking their Rentals (RENTS) tokens for various periods. The platform offers three staking options, each with its own set of benefits and reward rates. This system is designed to cater to different investment horizons and reward preferences.

4.2 Daily Staking

Duration:	1 day
Reward Rate:	0.1% daily
Description:	Ideal for users who prefer short-term commitments and need flexibility. Daily Staking allows for the continuous accrual of rewards while maintaining the ability to access tokens with minimal delay. It's perfect for those looking for liquidity with daily earnings.

4.3 6-Month Staking

Duration:	6 months
Reward Rate:	1.5% monthly
Description:	Suitable for users willing to lock their tokens for a medium-term period. This option offers a higher monthly reward rate compared to Daily Staking, making it attractive for those who can commit their tokens for a longer period.

4.4 1-Year Staking

Duration:	1 year
Reward Rate:	2.5% monthly
Description:	Designed for users committed to a long-term investment. This option provides the highest monthly reward rate, reflecting the longer commitment. It maximizes returns for users willing to lock their tokens for a full year.

4.5 Additional Features

- **Flexible Withdrawal:** For Daily Staking, users can withdraw their staked tokens at any time without penalty, offering the highest level of flexibility.
- **Automatic Reward Accrual:** Rewards for all staking options are automatically credited to users' accounts, simplifying the earning process.
- **Reinvestment Options:** Users can choose to reinvest their earned rewards into additional staking periods to compound their returns, enhancing overall earnings.

4.6 Benefits of Yield Staking

- **Attractive Returns:** Higher reward rates for longer staking periods provide greater earning potential.
- **Enhanced Liquidity:** Daily Staking offers immediate access to funds, balancing flexibility with earnings.
- **Compounding Rewards:** Option to reinvest rewards increases overall returns, benefiting long-term investors.

05.

Real World Assets (RWAs)

5.1 The Concept of RWAs

Real World Assets (RWAs) refer to physical and tangible assets that are digitalized and represented on the blockchain. These can include real estate, properties, vehicles, and other physical goods. Rentals uses RWAs to ensure the authenticity and integrity of the listed tourism and accommodation assets on the platform.

5.2 Implementation of RWAs at Rentals

Rentals will incorporate sustainable hotels and other tourism assets in the Amazon, representing these assets as RWAs on the blockchain. This approach guarantees transparency, traceability, and provides a new form of investment and security for users and partners. By digitalizing these assets, Rentals enhances the credibility and accessibility of its offerings, fostering trust and engagement within the ecosystem.

06.

Roadmap

Q3 2024

- Market research
- Concept development
- Feasibility study
- Creation of the economy and tokenomics
- Development of project documentation and Whitepaper

Q4 2024

- Creation of the website and communication channels
- Smart contract development
- Marketing planning for the public token offering
- Start of platform development
- Launch of the public token offering

Q1 2025

- Listing of RENTS on DEX and CEX
- Closed beta testing of the platform
- Platform security testing
- Audit
- Marketing campaign to expand reach
- Securing strategic partnerships

Q2 2025

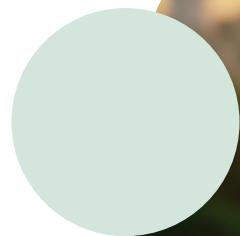

- Launch of the Rentals Digital platform
- Distribution of earnings to token holders
- Closing deals with brand ambassadors

Q3 2025

- Listing on additional CEX platforms
- Creation of a strategic growth team
- Addition of new functionalities
- Continuous improvement

07.

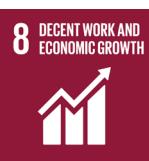

Social and Environmental Impact

7.1 Commitment to Sustainability

Rentals is dedicated to sustainable tourism and environmental preservation. We utilize sustainable hotels in the Amazon, promote ecological practices, and support biodiversity protection. Additionally, the platform encourages responsible tourism practices.

7.2 Impact on Sustainable Development Goals (SDGs)

Rentals supports several UN Sustainable Development Goals, including:

Decent Work and Economic Growth

Industry, Innovation, and Infrastructure

Sustainable Cities and Communities

Responsible Consumption and Production

Climate Action

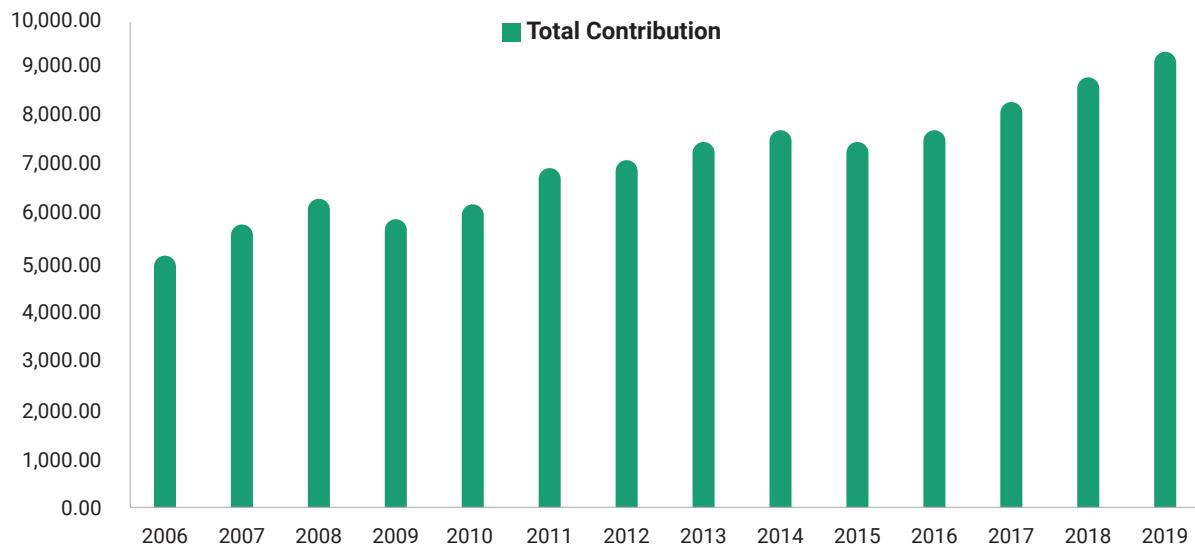

Life on Land

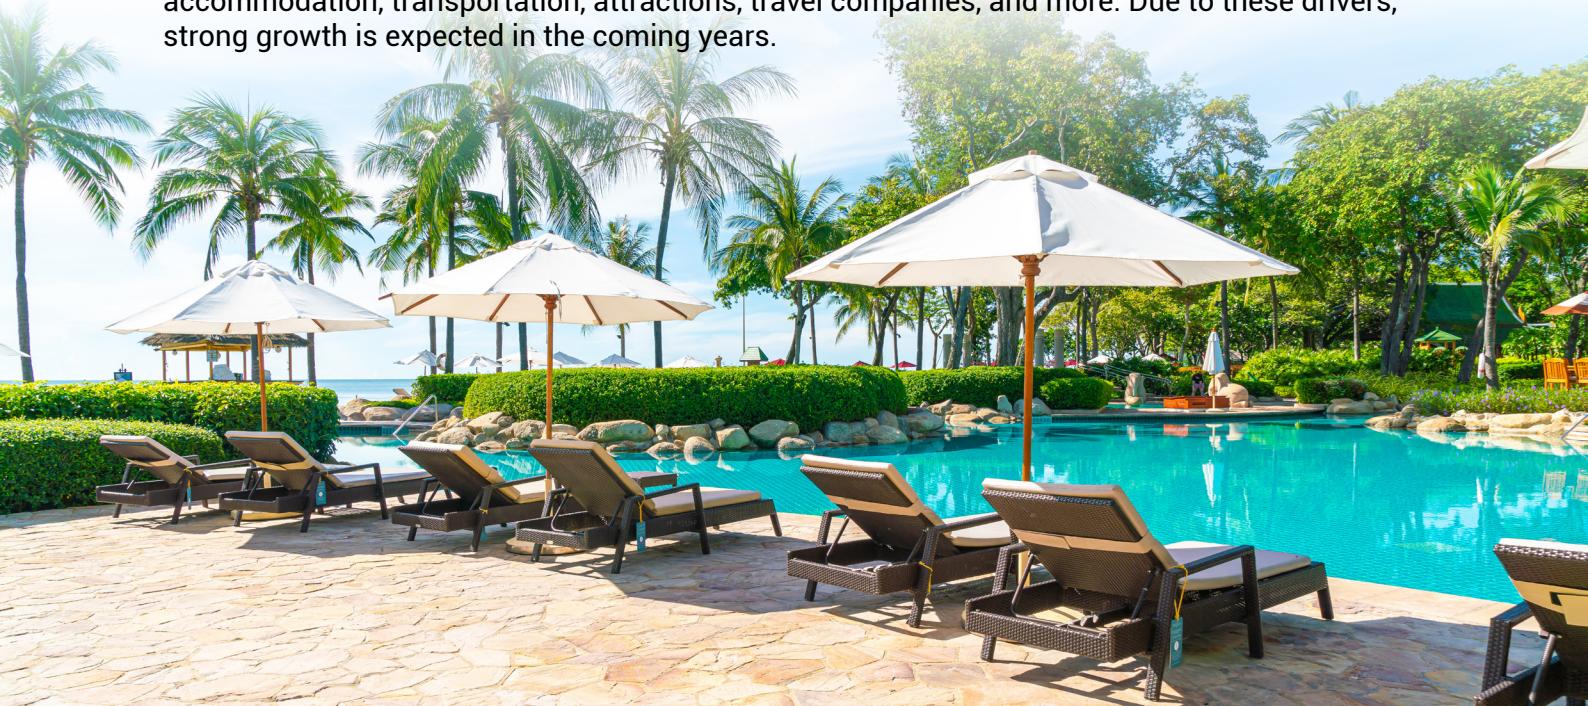

The **travel and tourism sectors** are essential drivers of investment and economic growth worldwide. This **segment generates \$8.8 trillion**, accounting for 10.4% of global GDP, and **creates 319 million jobs**, equivalent to one-tenth of all jobs globally.

In 10 years, tourism revenues are expected to represent 11.4% of the global economy, with an impact of \$16 trillion on the GDP of countries. These forecasts were released by the World Travel and Tourism Council (WTTC), an entity representing the private sector of the global tourism industry. The WTTC's Economic Impact Report (EIR) also projects the creation of 449 million jobs thanks to tourism, corresponding to 12.2% of the global workforce over the next decade.

Sector Contributes Billion \$

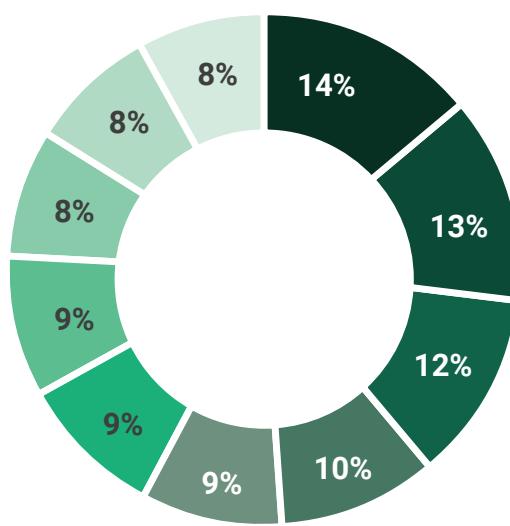

According to international macroeconomic data monitored by the leading international organization, the World Trade Organization, one of the largest industries in the commercial services sector is tourism and travel. This sector encompasses many industries, including accommodation, transportation, attractions, travel companies, and more. Due to these drivers, strong growth is expected in the coming years.

Domestic and international travel has become increasingly common worldwide. As a result, spending on both leisure and business travel has grown year over year for the past five years. This increase in travel has also driven the growth in hotel guests and, consequently, the expansion of the hotel industry's reach. Key performance indicators, such as RevPAR (revenue per available room), ADR (average daily rate), and occupancy, have shown annual growth over the past decade due to the influx of tourists around the world.

The 10 Global Biggest Industries by Revenue

- Global Life & Health Insurance Carriers
- Global Commercial Real Estate
- Global Car & Automobile Manufacturing
- Global Commercial Banks
- Global Auto Parts & Accessories Manufacturing
- Global Pension Funds
- Global Car & Automobile Sales
- Global Direct General Insurance Carriers
- Global Oil & Gas Exploration & Production
- Global Tourism

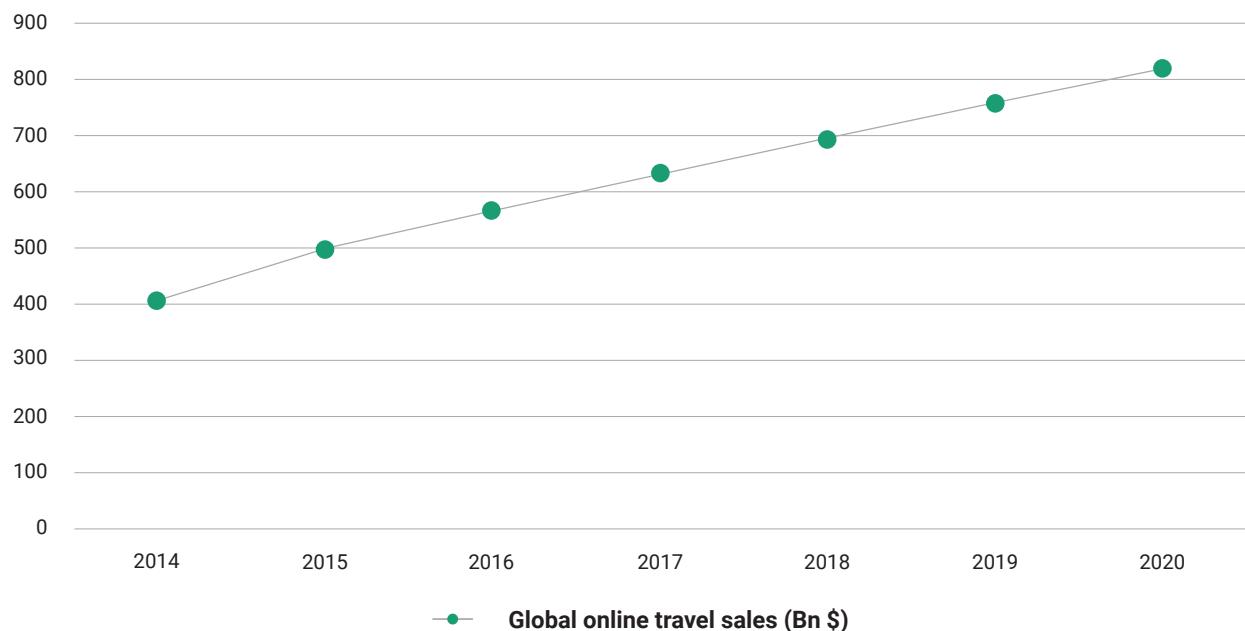

08.

Focusing on the tourism and travel sector

Many developing countries rely on tourism as a primary source of income, which is one of the main players in international trade and has seen constant growth in business volume, often equal to or even exceeding exports of oil, food products, and automobiles. With the growth of the sector, competition among destinations is a natural path to follow, which will result in the global expansion of tourism into industrialized countries and the generation of economic benefits and employment opportunities across many related sectors, from construction to agriculture and telecommunications.

Today, it's increasingly common for travelers to make their own reservations. With the advancement of digitalization in the travel industry, many consumers use online travel agencies to plan their trips. Although there are several major platforms, it's now possible to book almost any type of facility or event online. The journey, from the moment of departure to return, goes beyond just hotel bookings or ticket purchases. The traveler must also manage a variety of processes, such as private transportation, car rentals, boat tours, guide services, local shopping, tour guides, and even tipping. However, completing all these aspects often requires navigating multiple different platforms.

Online travel sales worldwide

09.

Proposed Solution by Rentals

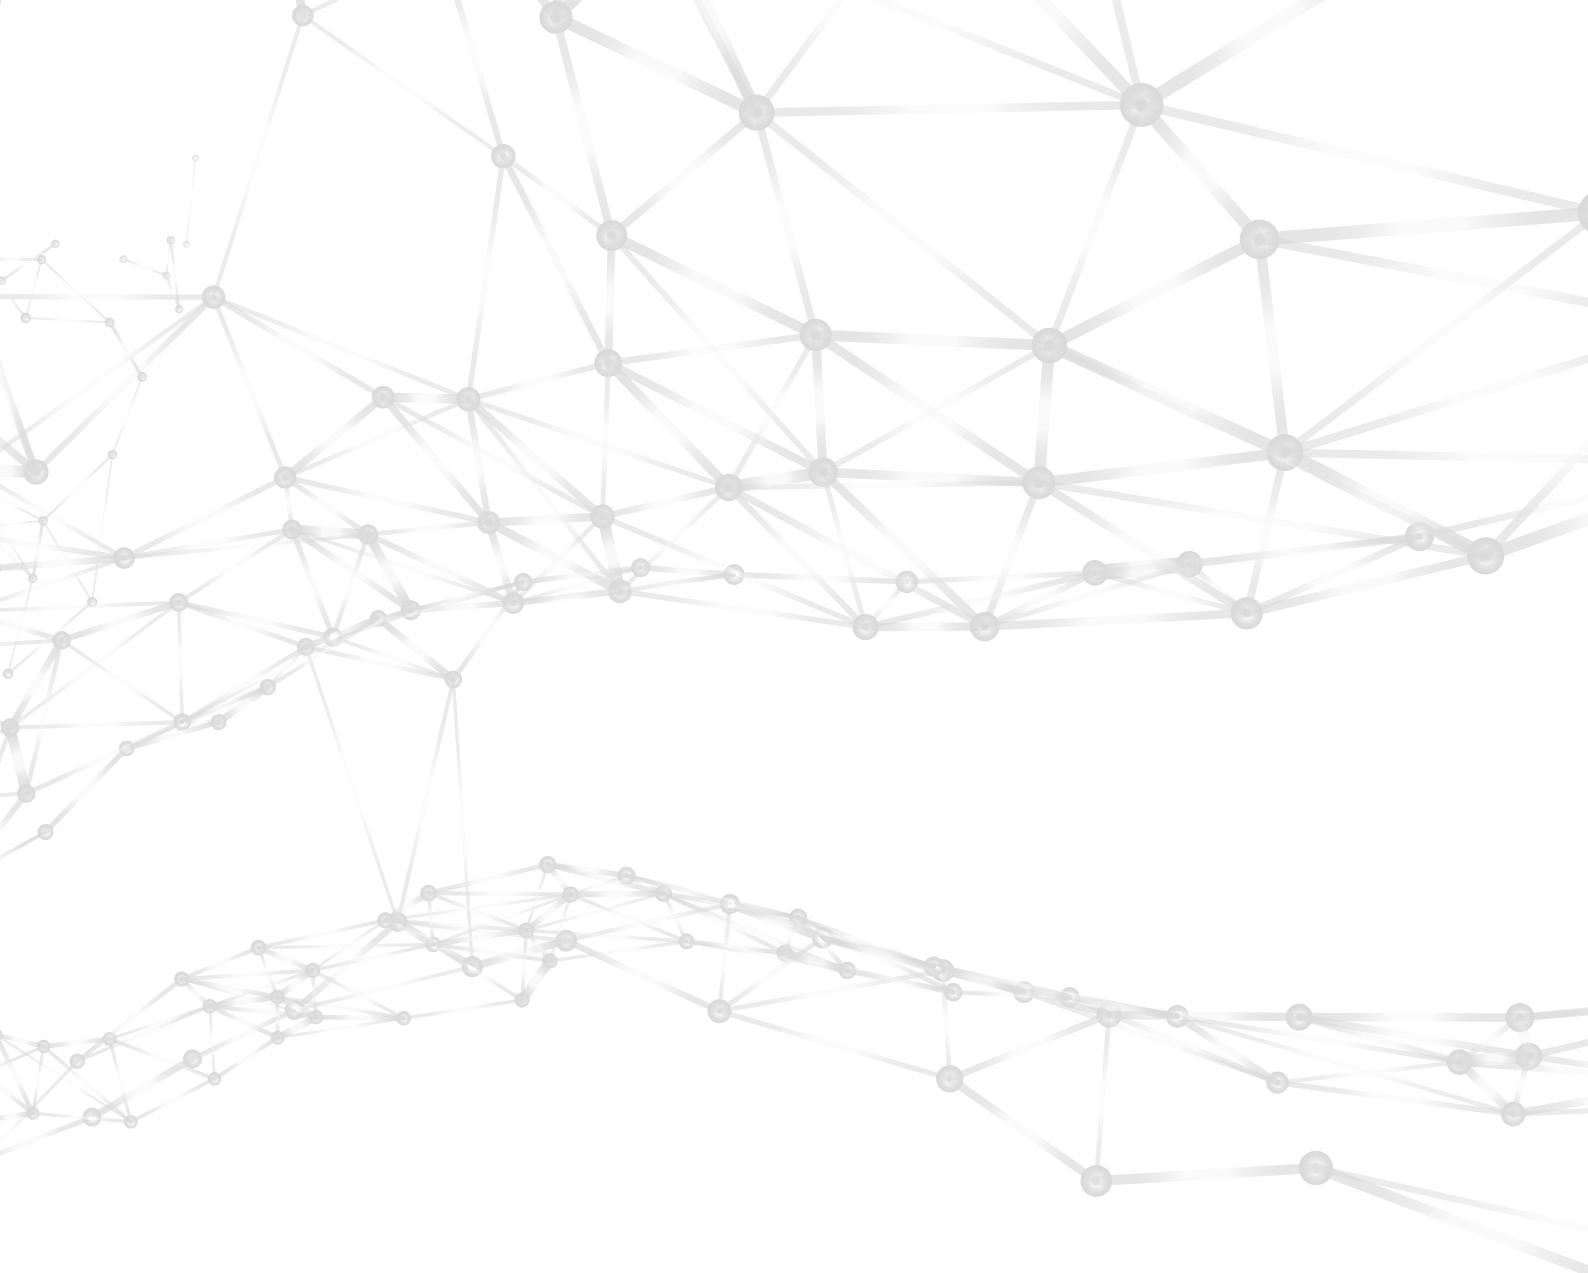

Rentals aims to consolidate all the challenges in the travel and tourism system into a single platform. Imagine a next-generation travel portal where major tourism companies don't promote their contracted facilities, only allowing genuine customer reviews. A portal where you don't have to pay in unfamiliar local currencies, avoiding chaotic Swift transfers or high credit card commissions.

With the Rentals platform, various accommodation providers, yacht charters, transport services, travel services, and ticketing companies from around the world can publish their products.

Thousands of travelers review and rate their experiences and are rewarded for it. You can ask questions, make reservations quickly, easily, and securely, and make all payments in an innovative and unique way.

Think of a massive platform where you can do this effortlessly using next-generation cryptocurrencies, earning digital rewards with every activity. Even by sharing your latest travel story with other users. Imagine earning rewards for recording videos, documenting your trip, and sharing on the Rentals rating system.
